<https://www.linkedin.com/in/ganesh-profile/>

Motivated and detail-oriented front-end developer seeking an opportunity to contribute to production-grade projects. Excited about the chance to apply and expand my skills in ReactJS.

## SKILLS

**HTML, CSS, JavaScript** – Having good knowledge in building Responsive Websites.

**ReactJS** - Beginner and have knowledge in basic concepts.

**Workflow:** Agile, Jira, GitHub.

## PROJECTS

- Developed and maintained front-end designs
- Actively learned and implemented best practices in front-end development.

### Vehicle Damage Assessment

**HTML, CSS, JavaScript, Flask, Python**

- It can be used by insurance companies for faster processing of claims if users can upload pics and the model can assess damage and estimate the cost of the damage.
- In the car insurance industry, a lot of money is being wasted on claims leakage. Claims leakage is the gap between the optimal and actual settlement of a claim.
- It takes a long time and results in delaying claims processing. An automated system on this will be a great help in speeding up the process.

### Portfolio

**HTML, CSS, JavaScript**

- A personalized online space where individuals showcase their work, skills, and achievements.
- It serves as a digital resume, created using technologies like HTML, CSS, and JS, allowing users to present their projects, talents, and experiences in a visually appealing and interactive manner. It's a virtual window into one's professional or creative journey.

### Weather Forecast App

**CSS, JavaScript, React.js**

- It provides instant weather reports based on the locations using **API** integration.
- Responsive Design: The weather App looks and works great on any device.
- It gives precise data on temperature, humidity, wind speed

**Phone Book App****CSS, JavaScript, React.js**

- Developed a phonebook application using React with a focus on simplicity and elegance.
- Implemented local storage functionality to persist phone numbers entered by users.
- Developed the search bar feature, enabling users to quickly retrieve contacts from the local storage.
- Ensured the uniqueness of phone numbers to prevent duplicates, enhancing data integrity.
- Integrated deletion operations for users to easily manage their contact list.
